Compatible Inkjets

PTi® engineers have tested virtually every combination of aftermarket ink available for each cartridge to establish what we feel is the best formulation for photos, graphics, and general text printing. In comparisons to the OEM, it's hard to tell the difference! Extensive research, using a number of proprietary processes, is how PTi® has become the leader in remanufactured inkjet technology.

We are proud of the fact every one of our remanufactured cartridges is produced in the USA and can stand up to the OEM's print quality. Every cartridge is 100% post tested and inspected.

Third party independent testing further verifies that PTi® inkjets produce crisp dark prints, rich colors, and magnificent photo quality pictures.
